PROFESSIONAL SUMMARY

Software Engineer (ESCOM-IPN) specialized in Data Science and Applied AI. Developed a predictive web system for the National Institute of Cancerology (INCAN) using complex NLP (BioBERT) and Machine Learning architectures. Experienced in .NET (C#), database migration, and cloud deployment (Azure/GCP). Recognized by IYF and Google as a STEAM Leadership Role Model.

TECHNICAL SKILLS

- AI & Data Science: Python, NLP (BioBERT), Random Forest Survival, Scikit-learn, Cumulative Risk Analysis.
- Backend & Cloud: C#, .NET Core, SQL Server, Oracle, Azure (AZ-900), Google Cloud.Tools &
- Methodologies: Git, Scrum, REST APIs, Medical Database Management.

KEY PROJECTS & EXPERIENCE

Oncology Predictive Web System (Thesis) | Project Lead | ESCOM - IPN / INCAN

AI Development: Engineered classification and survival models using BioBERT and Random Forest to predict breast cancer relapse and survival probabilities for Mexican patients. System Architecture: Designed a 3-module system featuring hierarchical user management, relapse prediction interfaces, and survival analysis dashboards. Clinical Impact: Implemented automated forms to process critical clinical variables for 500+ patients, streamlining data-driven treatment selection for medical staff.

Virtual Business | Junior Backend Developer | July 2022 – May 2023

Database Migration: Successfully executed a Legacy Oracle to SQL Server migration, significantly optimizing system performance and reducing operational costs. Backend Development: Built scalable backend solutions using C# and .NET tailored to specific business requirements.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900).
- Google Data Analytics Professional Certificate.
- Computing Foundations with Google Cloud.

LEADERSHIP & VOLUNTEERING

IYF "Conectadas" Ambassador: Featured as a Role Model in the Google.org documentary "Haz que suceda" and World Bank podcasts, promoting women in STEM. Public Speaking: Panelist for IMCO and IYF, advocating for gender gap reduction in technology.

LANGUAGES :English: Intermediate (Professional working proficiency).

Spanish: Native.
